

# The Olde Adventures of M.O.

- 
- ★ It's Hilarious!
  - ★ You'll Crack up every time you read it!
  - ★ Ha Ha!
  - ★ Real facts about the Nutria!
  - ★ 😊

By: Bailey and Ginger

Corvallis Franklin 4<sup>th</sup> Grade

Hello my name is Myocaster coypus, I am a nutria and I enjoy eating marine plants! One day as I was walking through the wetlands in New Orleans, I saw a few humans. One pointed at me and yelled "EWW!! A MUSKRAT! GET IT AWAY FROM ME!" That was when I decided to

sing:

I'm a Nutria!

I'm a Nutria!

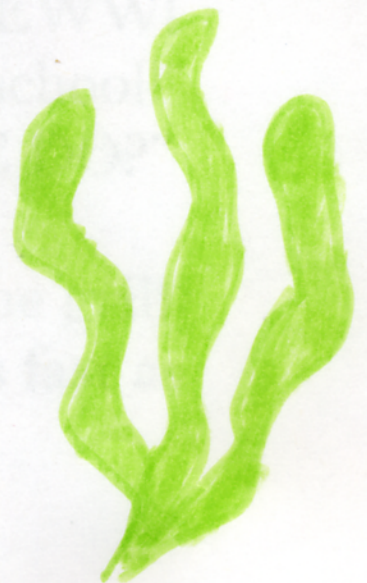

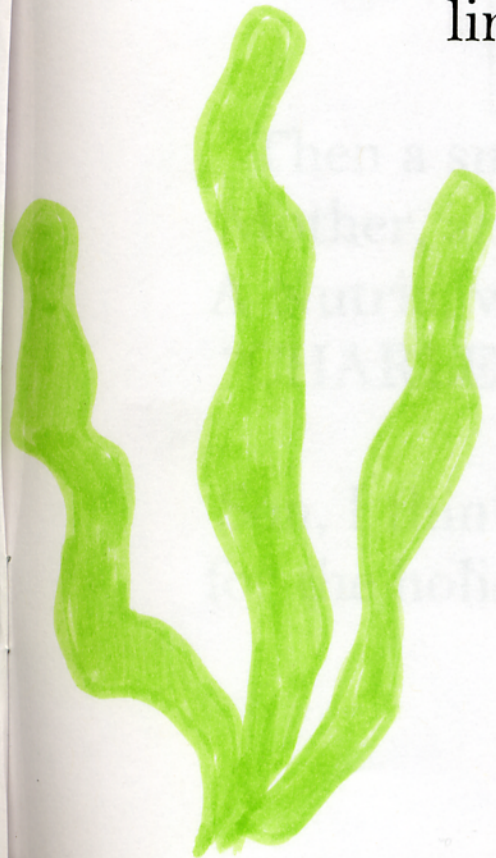

I like to eat plants!

And I'm a Nutria!

Out of that came an amazing reaction. "WOW! The muskrat talks!" Above me lingered a sign that read:

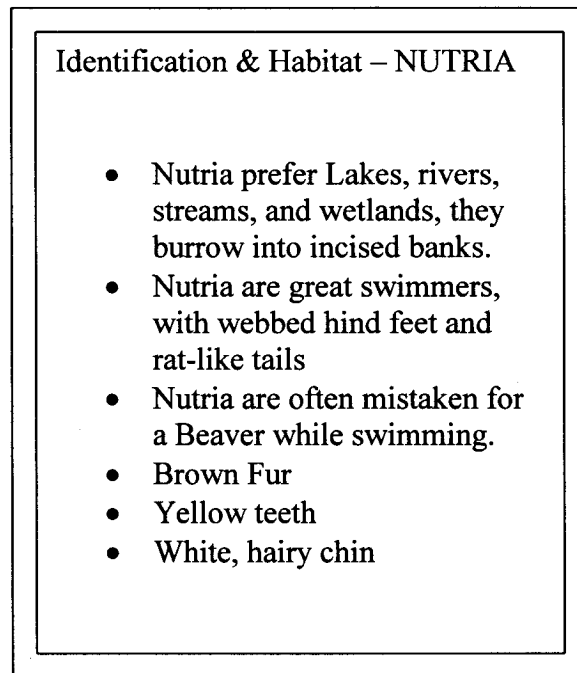

Environmental Impacts – NUTRIA

- Opportunistic Feeders
- Consumes 25% of body weight in Vegetation each day

“Wow! Hey Jackie, maybe we should have it as a pet!” “EWW! NO WAY! We should call the Zookeeper!”

At this point, I was freaking out. Beside me on the ground lay a small beaten up sign that read:

Then a small girl came with her Brother, Mother, and Father. The boy said “ EWW! A Nutria, we studied about these in school!” “CHARLES, WHAT SHOULD WE DO?”

Cried the mother. “

Son, I think we should fry it up on the grill for the holiday dinner.” I ran away as fast as

I could, and saw something on the ground,  
it read:

Distribution – NUTRIA

- Nutria are native to South America
- They have been introduced to Europe, Asia, North America, and Africa
- Nutria are very common in urban and suburban environments

Suddenly, a zookeeper picked me up. “Yup Bill, this is the last of ‘em!” and I got thrown into a cage and lived a happy life in captivity.

*The End*
